WOMEN'S HEALTH SERVICES PROVIDER

Secure Systems Integrated with Microsoft 365 Cloud to Support Remote Productivity

Challenges

- Safely Work from Home
- Ensure Security
- Eliminate Excess Login Activities

Benefits

Quick Transition to WFH

Minimal downtime to transition from in-person to remote, all while maintaining secure, powerful tools.

Increased Security

With Microsoft 365's built in security features and the help of a Microsoft partner, WCO has stronger protections for sensitive information.

Tailored Services

WCO's new single sign-on connectors is configured to fit their organization's unique needs.

Objectives

A 100+ employee healthcare organization ditched its bulky on-prem infrastructure and moved to the more secure, collaborative Microsoft Cloud. Subsequently, they sought TechHouse's expertise to simplify their logins while maintaining HIPAA compliance.

Solutions

TechHouse began by transitioning on-premises data to the Microsoft 365 Cloud and configuring advanced security features for the healthcare organization. In response to ongoing security concerns related to excess login activities, TechHouse created a password connector that integrated their scheduling system with Microsoft 365, simplifying logins. To this day, WCO benefits from secure communication in the Microsoft Cloud.
