

NEBRASKA-BASED SERVICING COMPANY

Collaborate Remotely in a
Secure Environment with
Business Premium

Challenges

- Concerns Over Disrupting Remote Workers
- New to Working with a Microsoft Partner
- Maintain Data Security

Benefits

Improved Security

With Business Premium configurations, company data is protected on both company and personal devices.

Cloud-Based Storage

With SharePoint and Office 365, access emails and documents securely.

Tailored Service and Support

With TechHouse, solutions are tailored to your business needs when you need them.

Objectives

Based in Nebraska, R.I.S.A Enterprises is a servicing company with 125+ employees. The owner sought to create a secure business environment by managing all emails via a cloud-based system and transitioning to the latest available version of Microsoft 365. R.I.S.A later inquired about improving their security posture, with a focus on securing their remote workers' environments

Solutions

In response to R.I.S.A. Enterprises' initial request, TechHouse assisted in setting the company up with Office 365 Business Standard and SharePoint to secure email and document sharing. In light of their security concerns, R.I.S.A. upgraded to Microsoft Business Premium for its additional cybersecurity capabilities. TechHouse customized R.I.S.A.'s Business Premium configuration to increase the security of both company and personal devices.
